

A Clear and Odorless Anti-Icing Pre-Storm Treatment

HeatWave™ is a corrosion inhibited liquid form of calcium chloride that has been tested and proven to be effective to -25 F. Apply HeatWave before a Snow Storm hits and it will not allow the ice and snow to bond to the concrete or asphalt. This makes post storm clean-up easier and less expensive. With a natural fertilizer it is the environmental choice in snow and ice removal.

Quick Facts on HeatWave™
